Handout #4

Ant Inspection Checklist/Map
BUILDING EXTERIOR

Inspector:_____ **Location:**_____

Cell/Pager #_____**Date:**_____

- Sketch an outline of the exterior of the building being inspected on the grid map below. An aerial view of the structure to be inspected can usually be viewed on www.pictometry.com, which will improve the accuracy of the drawing.
- The major 5 categories for ant inspection are listed below. Use the category numbers to mark locations on the map where these conditions are found (e.g., mark ant trails with the number 1). Write any comments in the spaces below or on the map.

1. Ant trails: _____
2. Food sources:_____
3. Moisture sources: _____
4. Entry points/harborage:_____
5. Location of sanitation problems and building repair needs:_____

_____

Handout #4

Ant Inspection Checklist/Map
BUILDING INTERIOR

Inspector:_____ **Location:**_____

Cell/Pager #:_____**Date:**_____

- Sketch an outline of the interior of the building being inspected on the grid map below. Either make a stand-alone sketch of each room that has a condition listed in items 1 – 5 below, or draw an outline of the building exterior and block in the rooms relevant to ant activity.
- The major 5 categories for inspection are listed below. Use the category numbers to mark locations on the map where these conditions are found (e.g., mark ant trails with the number 1). Write any comments in the spaces below or on the map.

1. Ant trails: _____
2. Food sources:_____
3. Moisture sources: _____
4. Entry points/harborage:_____
5. Other:_____
