UPC:

Stephanie Fong at the Central Valley Regional Water Quality Control Board announces an upcoming presentation by UC Berkeley's Dr. Don Weston on "Pyrethroid pesticides in the Sacramento-San Joaquin Delta: sources and impacts on Delta waters."

This will be a technical presentation summarizing Don's 2008-2009 monitoring of pyrethroid impacts on the Delta. Sampling included sites on the Sacramento and San Joaquin Rivers; Publically Owned Treatment Works; urban drains; agricultural drains; as well as transect areas that provided a gradient near the confluence of the Sacramento and American Rivers, the San Joaquin River around Stockton, and Ulatis and Alamo Creeks around Vacaville. Most of the toxicity found was attributed to pyrethroids.

The presentation will be Thursday, 9 July 2009 in the Central Valley Regional Water Board office Board Room at 11020 Sun Center Dr, suite 200, Rancho Cordova, CA 95670 from 1:00 - 3:00 PM. A location map is attached, and seating will be limited.
